AC Servo Motor with Synchroniser

Model	Voltage	Current	Power	Top Speed	Weight	Price
DS-28	170-260 volts	0-3Amps	0.75HP	3800 rpm	4.5 kilo	\$350.00 + GST

time saving Synchroniser:

When machine stops needle automatically stops down to turn work. When finished operator heels back on pedal, needle automatically positions to remove work without touching hand wheel.

Choice of internal or external synchroniser.

Enquire for details of your requirements, most new machine take the internal Synchroniser, older machines take the external, some might need an adapter. Overlockers might not need synchroniser.

12 months return to point of purchase for warranty claims.

Comes complete with:-

Pitman rod,
Belt 38M,
Instructions,
Belt guard,
and Fitting hardware.

Choice of internal or external synchroniser.
